Master JavaScript Bootcamp

CONGRATULATIONS! You are one step closer to master JavaScript

This bootcamp has helped 100s of students go from zero to confident-JavaScript developer in just a couple of months.

All I ask is 30 minutes of your time everyday. It is okay if you miss some days here and there.

But more importantly - No shortcuts. No cheating.

If you want to truly master JavaScript and become Web Developer that can build scalable web applications and get placed in companies like Google and Microsoft - you need to read all the lessons and solve all the challenges I throw at you in this bootcamp.

If you follow my roadmap you these JavaScript concepts would be a piece of cake for you:

- Rest, Spread, Destructuring
- map, filter, reduce - more array functions
- Closures, hoisting, event handling, IIFE
- Arrow functions, execution context
- "new", "this" - working and nuisances
- and much much more!!!

Are. You. Excited?

🚀 Learn. Implement. Iterate. 🚀
